

Module 3

Healthcare Data Model

Healthcare + Common Data Model

- What is the Microsoft Common Data Model (CDM)
- Microsoft Cloud for Healthcare solution layering
- Healthcare Data Model extensibility

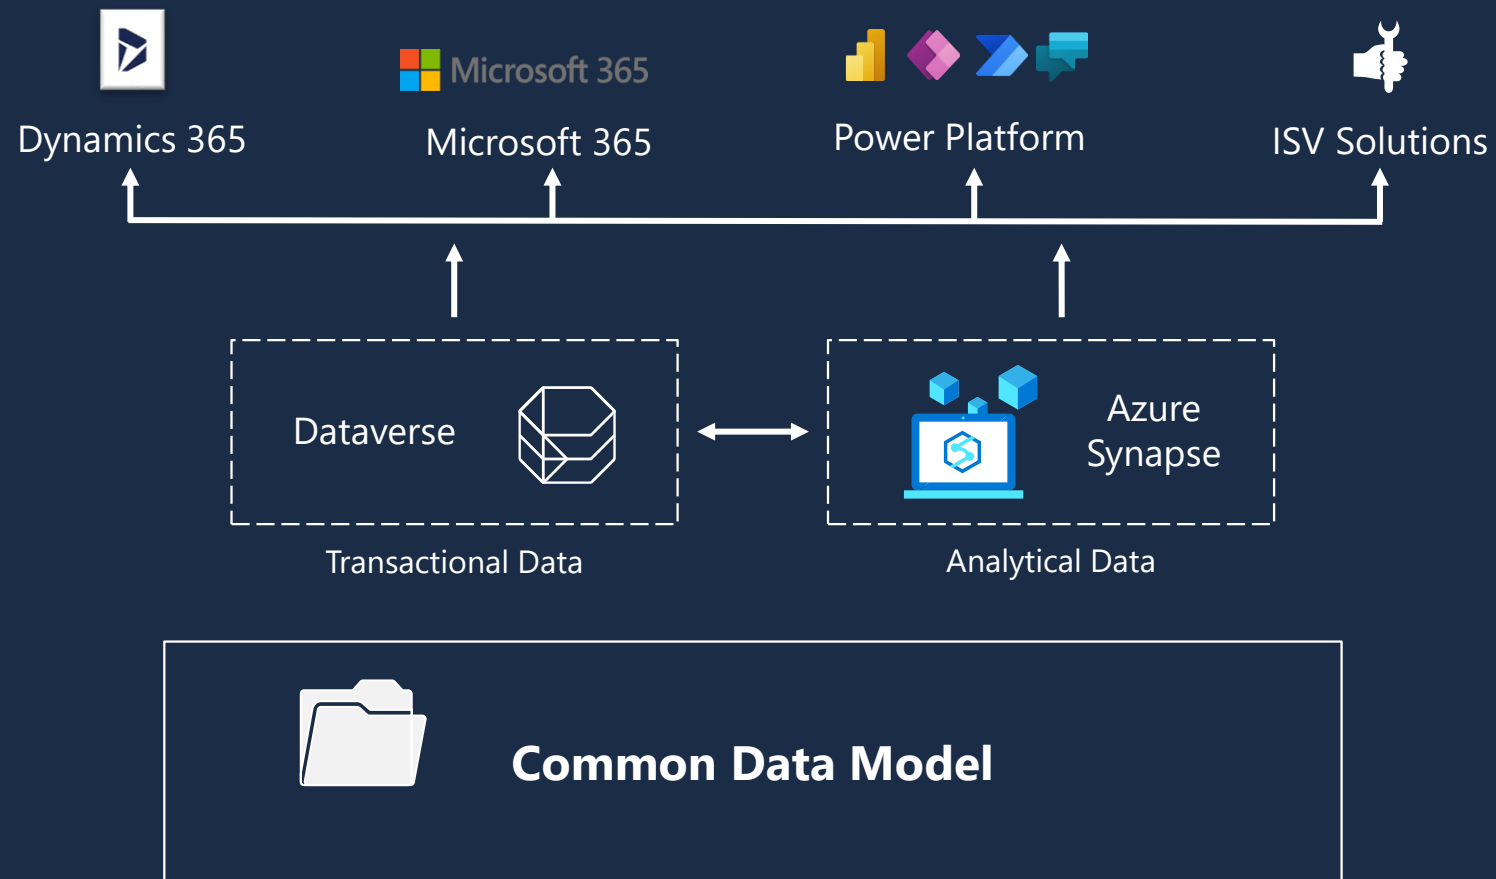

Microsoft Common Data Model

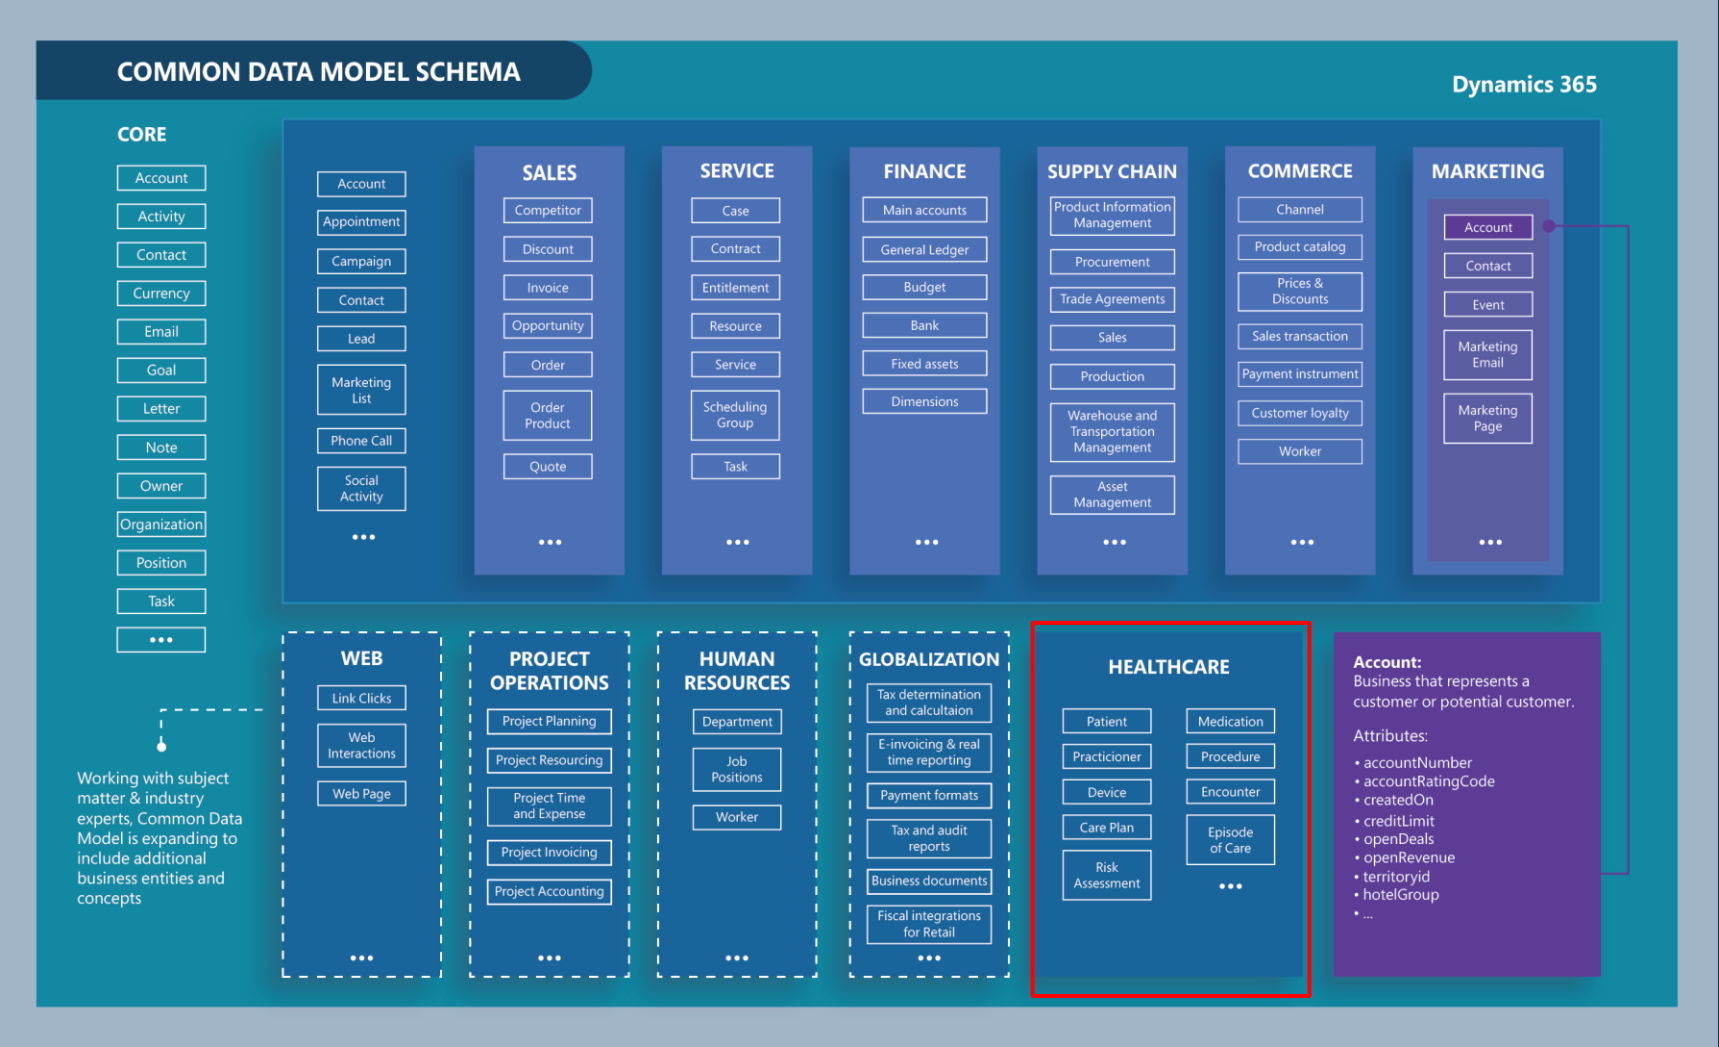

A common machine-understandable way to **describe data** with **semantic consistency** across business, transactional, analytical and industry domains that **drives interoperability** across apps and services from the Microsoft ecosystem, and customers to **create insights**

Microsoft Cloud for Healthcare

Microsoft Cloud for Healthcare provides capabilities to manage health data at scale and make it easier for healthcare organizations to improve the patient experience, coordinate care, and drive operational efficiency, while helping support security, compliance, and interoperability of health data.

Data management ▾

Deploy (0)

Data management

Managing the wealth of available healthcare data allows organizations to enhance patient engagement, improve clinical and operational insights, improve communications and enhance health outcomes.

☐ Add all Data management

Provider data model

This is the same HL7® FHIR® standards-based provider data model that comes included with all Microsoft Cloud for Healthcare solutions. Available as a standalone framework.

[Quick view](#) ☐ Add

Life sciences data model (preview)

The HL7® FHIR® standards-based life sciences data model (preview) is focused on clinical trial recruit entities and supports digital clinical trial management.

[Quick view](#) ☐ Add

Sync admin for FHIR

The sync admin helps sync patients' protected health information between EHR systems and Dataverse.

[Quick view](#) ☐ Add

Payor data model (Preview)

The HL7® FHIR® standards-based payor data model preview is focused on claim entities and support for revenue cycle management.

[Quick view](#) ☐ Add

Azure Synapse database templates

Templates for healthcare insurance, healthcare providers, and R&D and clinical trials data models

[Quick view](#)

Go to setup

Azure Health Data Services

Rapidly unify and standardize data coming from diverse streams such as clinical, imaging, device and unstructured data using our FHIR and DICOM services and Azure IoT Connector for FHIR.

Healthcare Data Model Extensibility

CDM Extensibility – Solution Delivery Model

*Disclaimer: Neither Microsoft Cloud for Healthcare nor any of its component technologies is intended or made available as a medical device for the diagnosis of disease or other conditions, or in the cure, mitigation, treatment or prevention of a disease. Partners are responsible for ensuring the regulatory compliance of any solution they build using Microsoft Cloud for Healthcare

Answer the following questions to see what you've learned.

1. Which of the following solutions was deprecated in November 2020?

- ☒ A Microsoft Cloud for Healthcare
- ☐ B Microsoft Cloud for Healthcare data model
- ☐ C Dynamics 365 Healthcare Accelerator
- ☐ D Dynamics 365 Field Service

2. Which one of the following apps isn't used by the Microsoft Cloud for Healthcare data model?

- ☐ A Dynamics 365 Project Operations
- ☐ B Dynamics 365 Field Service
- ☐ C Dynamics 365 for Marketing
- ☐ D Dynamics 365 Customer Service

3. The healthcare data model for Dynamics 365 is based on which of the following entities?

- ☐ A Common Data Model
- ☐ B Fast Healthcare Interoperability Resources (FHIR) standards framework
- ☐ C Dynamics 365 Customer Service
- ☐ D Azure Synapse

4. Common Data Model can be used by which of the following services?

- ☐ A Microsoft Dataverse
- ☐ B Microsoft Dynamics 365 and Power Platform
- ☐ C Microsoft Azure
- ☐ D All the above

Answer the following questions to see what you've learned.

1. Which of the following solutions was deprecated in November 2020?

- A ☐ Microsoft Cloud for Healthcare
 - B ☐ Microsoft Cloud for Healthcare data model
 - C ☒ Dynamics 365 Healthcare Accelerator
 - D ☐ Dynamics 365 Field Service
- ✓ Dynamics 365 Healthcare Accelerator was deprecated in November 2020.

2. Which one of the following apps isn't used by the Microsoft Cloud for Healthcare data model?

- A ☒ Dynamics 365 Project Operations
 - B ☐ Dynamics 365 Field Service
 - C ☐ Dynamics 365 for Marketing
 - D ☐ Dynamics 365 Customer Service
- ✓ Dynamics 365 Project Operations isn't used by the Microsoft Cloud for Healthcare data model.

3. The healthcare data model for Dynamics 365 is based on which of the following entities?

- A ☐ Common Data Model
 - B ☒ Fast Healthcare Interoperability Resources (FHIR) standards framework
 - C ☐ Dynamics 365 Customer Service
 - D ☐ Azure Synapse
- ✓ The healthcare data model for Dynamics 365 is based on the Fast Healthcare Interoperability Resources (FHIR) standards framework.

4. Common Data Model can be used by which of the following services?

- A ☐ Microsoft Dataverse
 - B ☐ Microsoft Dynamics 365 and Power Platform
 - C ☐ Microsoft Azure
 - D ☒ All the above
- ✓ Common Data Model is used by Microsoft Dataverse, Dynamics 365, Microsoft Power Platform, and Azure.
